

DUEL DUO TEST PLAN

Overview:

Testing functionality of the app.

Testing Criteria:

- Application boots loads in browser.
- Confirm application styling looks correct
- Clicking on the "See All Bots" should display all available bots for dueling.
- Clicking on draw should display 5 random bots to choose from.
- Clicking "Add to Duo" should add that bot to the player's duo.
- Added bot should display beneath a new HTML header saying "Your Duo".
- "Add to Duo" button changes to "Remove from Duo" after selecting to Duo and removes it from the selectable bots
- Selecting a third bot should not be allowed
- Winner should be the duo whose combined health ends up higher after the combined attack damage from the opposing duo is subtracted from the duo's health.
- Winning should add to the "Wins" score counter.
- Losing should add to the "Losses" score counter.
- Refreshing page should clear out score counters

Entry Criteria:

- Test criteria provided.
- Running version provided for testing.
- Test files provided.

Exit Criteria:

- All high priority tests have passed
- Allotted time is up.

DUEL DUO COUNT RESET TEST CASE

This test will verify that reloading the site will reset the wins and losses counters.

Steps:

1. Navigate to the Duel Duo game site.
2. Click on the “draw” button.
3. Select two bots to your duo.
4. Click on the “duel” button.
5. Confirm that a win or loss has been added to the respective counter.
6. Refresh the page.

Test Postconditions:

- Wins and losses counter should reset back to zero.

DUEL DUO COUNT RESET BUG REPORT

Description:

The application's wins and losses counters retain their counts when reloading the page. The counters are expected to reset back to zero when refreshing the page.

Steps to reproduce:

1. Navigate to the Duel Duo game site.
2. Click on the "draw" button.
3. Select two bots to your duo.
4. Click on the "duel" button.
5. Confirm that a win or loss has been added to the respective counter.
6. Refresh the page.

Expected Result:

- Wins and losses counters should reset to zero.

Actual Result:

- Wins and losses counters retain wins and losses values after reloading the site.

Environment:

- Chrome Version 119.0.6045.160
- Windows 11
